

PLAKA - ANKROMUR

Steel dovetail profile with ties for wall connections

REF 02.07.01 - Version V01 - 27/08/2020

Subject

The supply and installation of ANKROMUR profiles with ties ensuring the connection between a structure of reinforced concrete and a masonry wall.

Description

When masonry comes close against a wall or column of reinforced concrete, it is recommended to place galvanized dovetail-shaped profile, closed with a composite lid in the wall or the column. Adapted ties inserted in the dovetail profile will ensure a connection between the concrete and the masonry wall.

Application

When connecting a structure of reinforced concrete and the masonry.

Mark

ANKROMUR from PLAKA or equivalent.

Measurement

ANKROMUR profile per meter.

ANKROMUR hooks per unit.
