

Plaka Pecarive

Encofrado perdido para bordes de forjado

We are one team. **We are Leviat.**

Leviat is the new name of CRH's construction accessories companies worldwide.

Under the Leviat brand, we are uniting the expertise, skills and resources of Plaka and its sister companies to create a world leader in fixing, connecting and anchoring technology.

The products you know and trust, including Plaka, will remain an integral part of Leviat's comprehensive brand and product portfolio. As Leviat, we can offer you an extended range of specialist products and services, greater technical expertise, a larger and more agile supply chain and better, faster innovation.

By bringing together CRH's construction accessories family as one global organisation, we are better equipped to meet the needs of our customers, and the demands of construction projects, of any scale, anywhere in the world.

This is an exciting change. Join us on our journey.

Pecarive Encofrado de borde perdido para canto de losa o forjado

Pecarive es un encofrado de borde perdido compuesto de una malla de acero plastificada. Se suministra cortado y plegado en forma de angular doblado a 90°, en longitudes de 2,40m, teniendo en cuenta el ancho del zuncho de borde y la altura del canto del forjado.

Pecarive se coloca sobre la pared, delimitando así el canto del forjado a hormigonar. Los casetones o prelasas se colocan sobre mortero encima de la base del PECARIVE, para mantenerlo en su posición durante el hormigonado.

También, se puede clavar la base del Pecarive en las juntas de mortero de la fábrica y doblar la cabeza del clavo sobre las armaduras del Pecarive.

Dimensiones estándar (B x H):

12 x 18 cm

10 x 20 cm

13 x 17 cm

Otras dimensiones bajo pedido

Pekarive Encofrado de borde perdido para canto de losa o forjado

Pekarive permite también mantener un aislante para:

- Dejar una junta de dilatación
- Impedir un puente térmico
- Etc ...

Esquinas:

Se cortan las armaduras longitudinales de la base para permitir plegarlo con facilidad al ángulo deseado.

Precauciones

- En caso de canto de forjado importante, el Pekarive podría abrirse debido a la presión del hormigón. Se aconseja atar el Pekarive con alambre a las armaduras del forjado o usar tensores.
- Para evitar posibles manchas de oxido, se aconseja colocar el Pekarive 2 cm atrás de la cara interior de la pared.

Se colocara siempre el Pekarive con mortero, con o sin armaduras de reparto, según las prescripciones del fabricante de casetones o prelosas.
